

HSM-60

Heat Shrink Tube Processing Machine

PRODUCT APPLICATIONS

HSM-60 is mainly applied to heat shrinkable tube in automobile wire harness and home appliance wiring harness industry. With advanced thermal infrared radiation technology (wave length 3~6um), the heat absorption is highly efficient, evenly and compact.

The parameters can be adjusted to meet different technological requirements of heating tube.

PRODUCT FUNCTIONS

Good Thermal Compensation

With high power, the machine has a fast thermal compensation quickly.

Good Shrinking Quality

After the heating and shrinking process is completed, the glue melted evenly, the tube is cooled enough and the harnesses do not adhere one another.

Multi-Protection

There are several ways to protect the heating module. Especially, there are protections when the machine crashes or is powered off.

PRODUCT PARAMETERS

Item	Specification
Processing range	Diameter ≤ 12.5mm
	Length ≤ 60mm
Temperature	0-550℃
Power supply	220V AC / 110V
Power	2000W
Weight	40kg
Dimensions (L × W × H)	600 × 1300 × 350mm

* Processing capacity varies depending on the type and size of the material.
